

Important information on the new collection and fee system

On 01. 01. 2022 a new collection and fee system will be introduced in the district of Göppingen to reduce waste and conserve resources. **The amount of the future waste charge will be significantly influenced by your behaviour.**

Essential innovations:

- new residual waste bins with electronic chip are provided free of charge by the waste management company,
- in addition to the 120-litre and 240-litre residual waste bins, the 60-litre residual waste bin will be introduced,
- the 30-litre extra sack for additional residual waste quantities replaces the previous banderols.

Up to today, 60 percent of recyclable materials, such as bio-waste, packaging, glass and paper, are still in the residual waste bins. For recyclable materials, a legal obligation to separate them is prescribed. They can be returned to the economic cycle as raw materials. Not only the environment and climate are happy, but also your wallet in the future. With consistent waste separation, the weekly residual waste volume amounts to only 6 to 9 litres per person.

The waste fee continues to be composed of the annual personal fee and, from 2022, new: **the emptying fee**. The amount depends on how often you actually empty your waste can. The collection vehicle continues to pass by every 14 days. However, you will only make the barrel available for emptying if it is really full. This allows you to keep the emptying fee as low as possible. However, at least 10 emptings per year will be charged.

Look out! With the same tonne size and the same number of emptings, the charges for emptying are significantly higher than in previous years.

From 06. 03. 2021 onwards, every household receives a written proposal for a smaller residual waste can from the waste management company. If you agree with this recommendation, you do not need to do anything further.

If you do **not agree** with the proposed tonne size, please let us know your change request by 25. 04. 2021:

- On the Internet at www.myawb.de with your access data on the current fee notice or
- send us the attached return form by post.

For orientation purposes, we have presented the expected waste charges for the **year 2022**:

Expected annual charges

Household size	Annual charge
for one-person household	49.20 Euro
Two- or three-person household	78.60 Euro
Four- and multi-person household	90.60 Euro

Expected emptying charges

Bin size	Charges for ten minimum emptying	Charges for each additional emptying
60-litre bin	38.00 Euro	3.80 Euro
120-litre bin	76.00 Euro	7.60 Euro
240-litre bin	152.00 Euro	15.20 Euro

Waste pooling and the continued use of your existing residual waste bin are still possible under certain conditions.

The AWB will be happy to advise you on this.
